

Juan Jose Arango

Software Engineer · Full-Stack Web & Cloud · 7th Semester

arangojuanjoseweb@gmail.com | +57 300 603 0655 | Pereira, Colombia (Remote-Ready)

Portfolio: juan-arango-portfolio.vercel.app | GitHub: [Arango134204](https://github.com/Arango134204) | LinkedIn: [juan-jose-arango](https://www.linkedin.com/in/juan-jose-arango)

I build things that ship — and I can prove it.

3+ years delivering production-grade platforms for real clients: full-stack web apps, SaaS, IoT systems, and cloud deployments. Bilingual (EN C1 / ES Native). I write clean code, meet deadlines, and translate technical decisions into client language.

WORK EXPERIENCE

Software Engineer (Freelance) · Remote 2022 – Present

Full-stack development, cloud infrastructure & client delivery across LATAM and US markets

- ▶ **Delivered 10+ production web platforms** using HTML5, CSS3, JavaScript, WordPress & custom APIs — reducing average time-to-launch ~40% through reusable component libraries and templated CI pipelines.
- ▶ **Architected Firebase Auth + Firestore backends** for 3 client apps with real-time sync, role-based access control, and zero post-launch auth incidents.
- ▶ **Cut page load times 35–50%** via asset optimization, lazy loading, and layout refactoring — measurably improving SEO rankings and user retention for GA3 Energy Sostenible and other clients.
- ▶ **Configured full cloud stacks** on Hostinger and Google Cloud (DNS, SSL/TLS, CDN, file-system hardening) — achieving 99.9% uptime SLA, reducing setup time to under 4 hours per project.
- ▶ **Managed full SDLC** (requirements → design → dev → QA → deploy → support) for 3 concurrent client projects with 100% on-time delivery rate.
- ▶ Integrated **WhatsApp Business API automation** for order notifications, eliminating manual dispatch and reducing response time ~70% for a logistics client.

Interpreter – English/Spanish · Language Line Solutions · Remote 2025 – 2026

- ▶ Consecutive interpretation in medical, legal, and corporate settings — **100% accuracy rate**, zero escalations across hundreds of high-stakes sessions.
- ▶ Built precision-under-pressure skills now applied to writing clear specs, client demos, and cross-team communication in Agile environments.

Sales & Appointment Manager · EaCitofonos Colombia 2020 – 2025

- ▶ Managed client pipeline and service follow-ups; developed stakeholder communication skills applied daily to sprint reviews and client-facing deliverables.

FEATURED PROJECTS

MegaFlujo AI [In Active Development]

juan-arango-portfolio.vercel.app

Firebase · Android/Kotlin · Weighted Consensus Algorithm · Haversine Geofencing · UX/UI

- ▶ Real-time crowdsourcing mobile platform for Megabús (AMCO), Pereira's mass transit system — collects live occupancy data validated by a **custom weighted consensus algorithm**.
- ▶ Implemented **Haversine-based geofencing** to validate GPS-accurate user reports, reducing noise submissions and improving data integrity.

TECH STACK

Languages

JavaScript · TypeScript · Python · PHP · Kotlin · C++

Frontend

React · Next.js · Angular · Tailwind CSS · HTML5/CSS3

Backend

Node.js · Laravel · Flask · REST APIs · JWT Auth

Databases

PostgreSQL · MongoDB · Firebase/Firestore · Prisma ORM

Cloud/DevOps

Google Cloud · Firebase · Docker · Hostinger · Git/GitHub · CI/CD

Mobile & IoT

Android/Kotlin · Arduino · ESP32 · C++ (embedded)

CMS & Design

WordPress · HubSpot CMS · Webflow · Figma · Elementor

AI & APIs

OpenAI API · WhatsApp Business API · RESTful integrations

Methods & QA

Agile/Scrum · Clean Code · ISO 12207 · ISO 25010 · SDLC

EDUCATION

B.Eng. Software Engineering

Institución Universitaria
Visión de las Américas (IUVA)
7th Semester · Expected 2026

Relevant Coursework:

- Software Architecture & Design
- Software Quality (ISO/IEC 25010)
- Database Systems
- Mobile Application Development
- Software Requirements Engineering
- SDLC & Project Management

BarberSaaS — Multi-Tenant Management Platform [\[Full-Stack SaaS\]](#)

Angular · Node.js · Prisma ORM · PostgreSQL · JWT Auth · REST API

- ▶ Multi-tenant SaaS with role-based access control (owner / barber / client), real-time booking management, and modular admin dashboard — designed and built end-to-end.
- ▶ Designed relational schema with **Prisma + PostgreSQL** supporting concurrent tenants with data isolation; REST API with JWT-secured endpoints.

Simulador Biomédico IoT [\[Hardware + Software\]](#)

C++ · ESP32 · Arduino · Photoresistors · Serial Telemetry · 3D Modeling

- ▶ 3D-printed brain model with embedded photoresistors simulating meningioma detection; ESP32 reads sensor telemetry and streams real-time data to a dashboard.
- ▶ Full-stack across hardware-software boundaries: sensor input → embedded firmware (C++) → real-time data visualization.

MongoBites — RESTful API [\[Open Source\]](#)

github.com/Arango134204/MongoBites

Python · Flask · MongoDB · REST · CRUD

- ▶ Scalable RESTful API with full CRUD, query filtering, and MongoDB aggregation pipelines — built to production-quality standards with clean route architecture.

GA3 Energy Sostenible [\[Live Client\]](#)

ga3energysostenible.com

WordPress · Custom Theme · SEO · Performance Optimization · UI/UX

- ▶ High-conversion corporate platform for a renewable energy company — custom WordPress theme, SEO-optimized, sub-2s load time post-optimization.

ISO 12207:2017 Software Audit — Crater Invoice [\[Academic / QA\]](#)

QA · ISO 12207 · ISO 25010 · Laravel · Docker · PHP 7.4

- ▶ Formal software audit of the Crater open-source invoicing system under ISO/IEC 12207 and 25010 — architecture review, test suite debugging, and full V&V documentation.

LANGUAGES

Spanish: Native

English: C1 Advanced

French: A2 Elementary

OPEN TO

- Junior / Mid Full-Stack roles
- Frontend Engineer positions
- Remote & hybrid globally
- Internships (immediate start)
- Freelance contracts

STRENGTHS

- Bilingual client communication
- Autonomous / self-managed delivery
- Fast learner & tech adapter
- Cross-functional collaboration
- Problem-solving under pressure
