

# Juan Jose Arango

Software Engineer · Full-Stack & Cloud

arangojuanjoseweb@gmail.com · +57 300 603 0655 · Colombia (Remote-Ready) · English C1

*I build, ship, and scale web products — solo or inside teams.*

3+ years delivering production-grade platforms for real clients: zero downtime launches, Firebase-backed auth flows, and cloud infrastructure configured from scratch. Bilingual (EN/ES) and equally fluent in talking to code and to clients.

## EXPERIENCE

**Software Engineer — Freelance (Remote)** 2022 – Present

**Web platform development & cloud deployment**

- ▶ Delivered 10+ client web platforms using HTML5, CSS3, JavaScript & WordPress — reducing average client time-to-launch by ~40% through reusable component libraries and templated deployment pipelines.
- ▶ Architected Firebase Authentication + Firestore backends for 3 client apps, enabling real-time data sync and secure user flows with zero reported auth incidents post-launch.
- ▶ Configured full cloud hosting stacks on Hostinger (DNS, SSL, file permissions, CDN) — achieving 99.9% uptime SLA and cutting initial setup time from days to under 4 hours per project.
- ▶ Slashed page load times by 35–50% through asset optimization, lazy loading, and layout refactoring — directly improving client SEO rankings and user retention.
- ▶ Managed end-to-end SDLC for concurrent client projects: requirements → design → dev → QA → deploy → support, maintaining 100% on-time delivery rate across 3 active projects simultaneously.

**Interpreter — Language Line Solutions (Remote)** 2025 – 2026

**High-stakes English ↔ Spanish interpretation**

- ▶ Interpreted in medical, legal, and corporate settings with 100% accuracy rate — zero escalations or complaints logged across hundreds of sessions.
- ▶ Performed under extreme time pressure (real-time consecutive interpretation) in high-liability environments, building communication precision transferable directly to client-facing engineering roles.

**Sales & Appointment Manager — EaCitofonos Colombia** 2020 – 2025

**Client relations & pipeline management**

- ▶ Managed a client portfolio and service-follow-up pipeline, optimizing record accuracy and reducing missed follow-ups — contributing to measurable gains in client retention.
- ▶ Developed rapid decision-making and stakeholder communication skills directly applicable to Agile sprint planning and cross-functional team environments.

## TECH STACK

### Frontend

- ▶ HTML5 / CSS3 / JavaScript (ES6+)
- ▶ Responsive & mobile-first layouts
- ▶ WordPress (custom themes & plugins)

### Backend & Database

- ▶ Firebase Auth + Firestore
- ▶ REST API integration
- ▶ Performance tuning & caching

### Cloud & DevOps

- ▶ Hostinger (DNS, SSL, deployment)
- ▶ File system security hardening
- ▶ Git version control

## EDUCATION

**B.Eng. Software Engineering**

7th Semester — In Progress

## LANGUAGES

**Spanish:** Native

**English:** C1 Advanced

**French:** A2

## WHY ME

- ▶ Full-stack ownership: I spec, build, deploy, and maintain — no hand-holding needed.
- ▶ Client-first mindset: interpreter background means I translate tech to stakeholders effortlessly.
- ▶ Billing reality: freelance track record = I deliver or I don't eat.
